Milevsky Artem  
Consultant

Professional athlete, crypto enthusiast. Top scorer of the Ukrainian championship: 2009/2010.

## Problems and solutions

### Market fragmentation

The sports poker market does not have a single "entry point" for amateurs, professionals, tournaments, sponsors and advertisers.

### Global platform

POKERPAY brings together all market participants on one platform and provides a full range of tools for all representatives of the poker industry.

### Unreliability and fraud

Distrust of the rum's reputation. Fraud with prize funds and advertising contracts. Lack of control over random number generators on hands.

### Security and control

Secure platform for transactions, full control over any financial calculations.

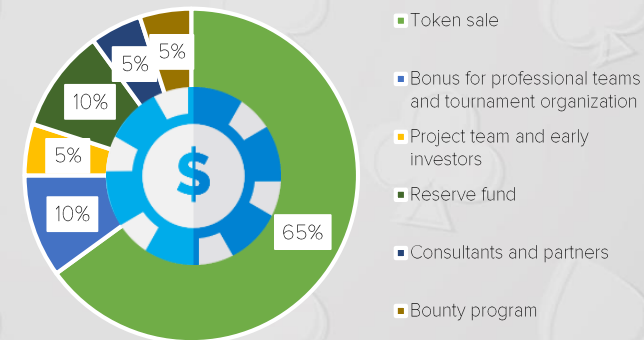

### Artificial intelligence

Mass distribution of bots and "tips" on AI.

### Algorithm transparency

The use of blockchain and smart contracts makes it possible to verify algorithms.

## Token Sale Distribution

Play, manage, earn with
